To.

The Secretary to Government,
Agriculture & Forests Department,
B O M B A Y.

No. D.I.1/KRJ

Public Works Department
Belgaum: 23rd July 1949.

Subject: Repairs to tank in Survey No. 97 at Karimattihalli, Taluka: Karajagi of Dharwar District.

Reference: Govt. (A & R.D.D.) Letter No.1522/19759-F dated the 26th May 1949.

Government agreeing to carry out necessary repairs to the tank in Survey No. 97 of Karimattihalli in Karajgi Taluka of the Dharwar District placed an allotment of Rs. 10,000/- at the disposal of the Director of Agricultural Engineering, Bombay Province, Poona (vide Govt. A & R.D.D.) letter No. 1522/15274-F dated the 23rd June 1947).

2. The Director of Agricultural Engineering, Bombay Province Poona, however, having expressed his inability to carry out the work, this Department was requested to report whether it would be possible for this Department to undertake the work (vide Govt. A & R.D.D.) Letter No. 1522/21003-F dated the 31st July 1947).

3. On this Department agreeing to undertake the work the said allotment of Rs. 10,000/- was to be treated as having been placed at the disposal of this Department (Vide Govt. A & R.D.D.) Letter No. 1522/23531-F dated the 22nd August 1947) As the figure of Rs. 10,000/- reported as cost of repairs in 1946 was very rough it was necessary to prepare a detailed project for approval of Government before the work could be put in hand.

4. The Executive Engineer, Dharwar Division carried out the necessary surveys and prepared the detailed project and submitted the same to the Executive Engineer, Dharwar Minor Irrigation Division, Dharwar for obtaining approval of the competent authority.

5. As the survey preparation of the project took some time the work could not be put in hand during the year and the allotment had to be surrendered (vide copy of the Executive Engineer, Dharwar Division's No. G-4/9 dated the 3rd February 1948 addressed to the Executive Engineer, Dharwar Minor Irrigation Division Dharwar and copy endorsed to the Director of Agricultural Engineering, B.P. Poona and also to this office.)

6. The Executive Engineer, Dharwar Minor Irrigation Division, Dharwar, was requested to obtain fresh grants from Government (vide the Ex. Engineer, Dharwar Dn.'s No. KRJ-16 dated the 29th April 1948 addressed to the Executive Engineer, Dharwar Minor Irrigation Division, Dharwar and copy endorsed to the Director of Agricultural Engineering B.P. Poona and also to this office)

7. The case papers, however, were retransferred to the Executive Engineer, Dharwar Division on 2nd April 1949 by the Executive Engineer, Dharwar Minor Irrigation Division Dharwar in view of the orders issued in G.R. (A & R.D.D.) No. 1314 dated the 5th November 1948.

8. The cost of the project as prepared by the Executive Engineer, Dharwar Division after survey and estimate in detail comes to Rs. 50,000/- as against Rs. 10,000/- originally reported. This works out to Rs. 126 times the irrigation share of Rs. 394--8-3. In view of this question of taking up the repair work at this high cost will have to be reviewed.

9. Further this tank has got a catchment area of 69 Sq. miles (roughly same as that of Neersagar Water Supply Project) with a high flood discharge of 37000 cusecs. But it has got only 150' clear overfall plus 152 feet submerged waste weir (against 800 feet length of clear overfall waste weir of Neersagar Reservoir) Hence the question of providing suitable waste weir for the tank is to be thoroughly investi-gated and project carefully prepared.

10. Under these circumstances and for the reasons already explained in para 1(ii) of this office letter No. D.I.1/KRJ dated the 15th March 1947 (copy attached) the success of restoring this tank at a reasonable cost is highly problematic However rough plans and estimates prepared for the work will be carefully scrutinised and modified where necessary and the whole project submitted to Government as early as possible

Office of the Executive Engineer, Miraj Division

Miraj, *Dated* 16th August 1949

Dear Mr. Gogtekar,

Your D.O.No.8122/36 I B (II) dated 12th August 1949 to hand.

I had prepared a Village Water Supply Scheme for the Dharwar District in the year 1944-45. A copy of the Scheme was presented to the Honourable Mr. B.G.Kher, the Premier of Bombay when he inaugerated the Village Water Supply Scheme in October 1946. I had also --- presented a copy to the Honourable Mr.M.D.D. Gilder. One copy was left with the District Local Board Dharwar. At present I have not got a fair copy of the Scheme.

As regards the History of the preparation of such a Scheme I may tell you that it is more a personal matter than official. I was writing a thesis on Rural Engineering Problems in Dharwar District. The thesis was divided into three parts viz. I, Development, of roads, II, Development of Village Water Supply and III -- Village Reconstruction. The part II is the - Village Water Supply Scheme in Dharwar District. I had submitted the thesis to the University last year for Ph.D.(Engineering) It has been, however, returned back to me, with certain remarks. I - have to resubmit it but I am at present too busy to do that. Since you want the same immediately I am arranging to send the same. You may return when done with. Ofcourse the thesis is a voluminous work covering 596 typed pages of the size of 10" x 15" plus a seperate volume for - Maps. I am required to send both the volumes to you as both the volumes contain, partly, Village Water Supply Scheme. The pages that cover - "Village Water Supply" are from 146 to 437. I hope you will receive the same within 2 or 3 - days.

I have received a similar call from the the

from the Honourable Minister for Agriculture. and I request you to send the same to the Honourable Minister.

I am thankful to you for making enquiries about my work.

With best compliments,

Yours sincerely

V.S. Patil

TECHNICAL ITEM.

I) Sinking and constructing a well at Erkner, near Fehrbelliner.

1) Three water drawing arrangements only, need be provided during actual construction as per type plan for a 30' dia. well.
2) The drawings should be corrected as pointed out. The estimate does not agree with the drawings.

3) A three inch offset should be kept in rock below the masonry steining, if feasible.

II) Sinking and constructing a well at Brandhorst, Kreis Naver.

1) In view of the disappointing engineer G.C. Colgaon's No.6-lit mier 27-6-1960, as the strata anticipated is hard, the steining work may be lined sort was any with thereof strength one side and the estimate also provision for such rock.

2) A re-preparation test should be taken nature starting the masonry staining and the attempt of water surely ascertain

3) A statement from the villagers should be taken to the effect that they will have no objection for the boring kept open for use to all communities including Harijans.

***

No. V.W.S.
Office of the Collector,
Dharwar, 9th Octr.1950.

To

The Superintending Engineer, K.I.C.,Dharwar.

Ref: Your No.G-116 dated 19-9-1950.

Government in Health & Local Govt.Deptt.Memo No.6841(D) dated 9-11-1949 have informed that the Collectors should include in their annual programme the works of conversion of step wells into draw wells where guinea worm disease is prevalent and that the quarterly progress reports regarding the progress made in this connection should be submitted. In accordance with the Govt.instructions, allotments of Rs.4000/- to each of the following works have been sanctioned by the Collector during the current year.

1. Conversion of step well into draw well at Hangal
2. -do- Annigeri
3. -do- Amminbhavi

Since these three works are found to be necessary, Government may please be moved to accord sanction for taking them up during the current year.

223

No. G-116

Office of the Superintending Engineer,
Karnatak Irrigation Circle,
Dharwar, 31 Octr.1950.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject: V.W.S.Scheme: Conversion of a step well (Kurbar well) into draw well at Hangal, Dist: Dharwar.

Reference: Government, Local Self Government & Public Health Department No.S.92 dated the 5th October 1950.

In accordance with the orders issued under Government, Health & Local Government Department Memo No.684(D) dated 9th November 1949, the Collector of Dharwar has sanctioned an allotment of Rs.4000/- during the current year for the above work and has requested this Department to take up the work early. A copy of his letter No.V.W.S.dated 9-10-1950 in this connection is enclosed herewith for perusal of Government. As per present orders of Government no new well work can be started withour prior approval of Government. However, in view of the prevalence of guinea work disease at Hangal it is proposed to take up the work as early as possible. This may kindly be approved as a

special .....

special case. Plans and Estimates for this well work, however, have already been administratively approved by me.

Reference: Government, Local Self Government & Public Health Department No.S.92 dated the 5th October 1950.

In accordance with the orders issued under Government, Health & Local Government Department Memo No.684(D) dated 9th November 1949, the Collector of Dharwar has sanctioned an allotment of Rs.4000/- during the current year for the above work and has requested this Department to take up the work early. A copy of his letter No.V.W.S.dated 9-10-1950 in this connection is enclosed herewith for perusal of Government. As per present orders of Government no new well work can be started without prior approval of Government. However, in view of the prevalence of guinea worm disease at Hangal it is proposed to take up the work as early as possible. This may kindly be approved as a

special .....

special case. Plans and Estimates for this well work, however, have already been administratively approved by me.

2 The S.E. K.I.C. states that in accordance with the orders issued in LSG+PHD's memo No 6841(D) dt the 9-11-1949, the Collector of Dharwar has sanctioned allotment of Rs 4000/- during the current year for the work of conversion of step well into draw well at Hangal, Dist Dharwar and has asked to take up the work early. In Govt PWD Cir. No 5342/36 dt 29-6-1950 orders have been issued that no new work should be taken up until the financial position is reviewed. The S.E. however requests approval to take up the work in view of the prevalence of guinea worm disease at Hangal as a special case. He further states that the plans & estimate for the well work have already been administratively approved by him.

3 In the circumstances explained by the SEKIC, he may be permitted to take up the work after obtaining orders of the LSG+PHD.

***

No.V.W.S.
Office of the Collector,
Dharwar, 23rd February 1950.

Letter :

To

The Secretary,
Local Self Government and Public Health Department.
Bombay.

Reference Government endorsement No.6841/5349-D, dated the 10-2-1950.

2. Reference is solicited to letter No.37-4092-D, dated 14-2-1950 of the Director of Public Health addressed to Government. The Director of Public Health in his above letter has requested Government to sanction provision of a barbed wire fencing all round the tank and erection of a platform with pulleys. After the same is sanctioned by Government, the President District Local Board will be asked to prepare plans and estimates of the work immediately.

3. The President, District Local Board is being requested to take immediate steps to sink a second bore in S.No.3 of the village as desired by the villagers.

4. As regards the Joint Organisers proposal of setting up of an oil-engine to pump out water and providing water taps and bathing and washing ghat, the feasibility of the proposal is being enquired into and the report will be submitted to Government early.

To

The Collector of Dharwar,
DHARWAR

Subject :- Guineaworm-Prevalence of-in Hallapur, village, Ron Taluka District Dharwar. Complaint by Joint Organiser, Village Industries Committee, Ron, District Dharwar.

Reference correspondence, ending with your letter, No.V.W.C., dated the 23th February 1950, on the subject mentioned above.

2. The proposal to provide barbed wire fencing all round the tank at Hallapur Village in Dharwar District and to erect a plat-form with pulleys, is approved. Please ask the President, District Local Board, Dharwar, to have plans and estimates prepared and submit them to Government together with an estimate of the recurring cost involved. When forwarding the estimates, please suggest by whom the cost both recurring and non-recurring should be met.

3. Please submit a further report to Government, about the sinking of a ground bore in survey No.3 and construction of a well if sweet water is found underground, and also in respect of the proposal to set up an oil engine, etc., mentioned in the last paragraph of your letter.

4. The Director of Public Health is being asked to instruct the District Health Officer, Dharwar, to continue to disinfect the tank till barbed wire fencing and a plat-form with pulleys are provided.

5. Copies of the Director of Public Health's letter, No.37/4092-D, dated the 14th February 1950, and of its accompaniment are forwarded herewith for your information.

LETTER.

From

The Superintending Engineer,
Southern Circle.

To

The Secretary to Government,
Local Self Government and Public Health
Department Bombay.

No.G-116-A/DD. Public Works Department,
Belgaum, 30th November 1950.

Subject:- Village Water Supply Scheme:
Conversion of step well into Draw Well
at (1) Anigeri (2) Aminbhavi,
District Dharwar -

Well at Annigeri: It is learnt that a piped water supply scheme has been approved by the Board of Health and Preliminary investigations are being carried out. The proposed well has to be the source of supply for this proposed piped water supply scheme for this village. The village has a population of 8091 human beings and 2725 cattle (as per 1941 census) and has got a Village Panchayat Committee also in whose area the well work lies. There are already some private wells and 2 District Local Board Wells in addition in this village and the details of these wells are given in a statement which accompanies the project.

2. Well at Aminbhavi : The population of this village is 4106 human beings and 2000 cattle (as per 1941 census). There are two tanks and some private wells in this village also. The proposed well work lies in the area of the Village Panchayat Committee, of Aminbhavi .

3. The Collector of Dharwar is stated to have sanctioned an allotment of Rs.4,000/- for each of the above two well works for this year, which however, is insufficient to complete the works, the costs of which are estimated to be Rs.19,486/- for Annigeri and 25,918/- for Aminbhavi respectively.

4. Both these works are new works. As per current Government orders in Government Circular (Local Self Government and Public Health Department, No.S-92 of 20th June 1950) no new Village Water Supply Works are to be taken up for execution, if there is at least one well or any other source of supply providing drinking water throughout the year. The Collector and the President, District Local Board Dharwar, however, are persistantly pressing for taking up these two works immediately although the above mentioned Government Orders were pointed out to the District Local Board. The Collector of Dharwar in his letter No.V.W.S. dated 9th October 1950 (copy enclosed) states that Government in Health and Local Self Government Department Memo: No.6841(D) dated 9th November 1949 have informed that he can include in his annual programme the conversion of step wells into draw wells where guinea worm disease is prevalent. It is, however, not clear whether such works can be taken up irrespective of the Government Orders contained in the Government Circular (Local Self Government and Public Health Department) No.S-92 of 20th June 1950.

5. In view of the foregoing paras Government Orders are requested as to whether the works in question should be taken up under the Village Water Supply Scheme this year.

6. The plans and estimates for both these works are submitted for favour of perusal. Those for the well at Aminbhavi may be administratively approved if Government decides to take

up.....

up these works. The other for Annigeri costing Rs.19,486/- may be returned with orders for further action.

L E T T E R.

To

The Superintending Engineer, Southern Circle,
B e l g a u m.

Subject:- Village Water Supply Scheme:
Conversion of step well into Draw Well
at (1) Anigeri (2) Aminbhavi,
District Dharwar -

No.S.92(16)/4330-M. Bombay Castle, 24th February 1951.

Reference your letter No.G.116-A/DD, dated the 30th December 1950.

2. Although Government has given importance to the work of conversion of the existing step wells into draw wells where guinea worm disease is prevalent, Government feels that the action of the Collector of Dharwar in sanctioning Rs.4,000/- for each of the step wells in Annigeri and Aminbhavi villages is not entirely justified. As a piped water supply scheme for Annigeri is under consideration, there was no need to hurry up with the work of converting the step well into a draw well, which is estimated at Rs.19,486. As regards the work at Aminbhavi, the estimated cost viz. Rs.25,918 is prohibitive and the work should have been undertaken only if alternate sources of water supply do not exist in the villages.

3. In view of financial stringency, it is not possible to sanction more funds for these twoworks. The works should not therefore be taken up for execution.

4. The plans and estimates received with your letter are returned herewith.

Sd/- B. J. Naik,
Under Secretary to the Government of Bombay, Local Self Government and Public Health Department.
